OPEN STRONG

# 1. The Idea

# MyTakziah

## One Family Record. Clearer Next Steps.

A proposed assistant helping bereaved families prepare for JPN, KWSP and PERKESO.

**Team Survive | Universiti Malaya and Asia Pacific University**

Anderson Ling | Hee Zi Jie | Wong Xuan Rui | Yow Li Hao

**Student Proposal**
**Not an Official Government Service**

WHY THIS MATTERS

## 2. The Problem

# After a Death, the Paperwork Still Repeats

**198,992**

deaths recorded in Malaysia in 2024

| | | |
|---|---|---|
| JPN | Identity | Proof of Death |
| KWSP | Identity | Proof of Death |
| PERKESO | Identity | Proof of Death |

**A Deadline Families Cannot Afford to Miss**

EPF Death Assistance requires application within six months, death before 60, and other conditions. This is not a deadline for withdrawing all EPF savings.

Sources: DOSM, Vital Statistics, Malaysia, 2025; DOSM, Current Population Estimates, 2026; KWSP, Death Withdrawal.

MAKE IT EASY TO UNDERSTAND

# 3. Our Solution

## Provide Shared Details Once. Prepare the Next Step.

### Reuse

Shared details in relevant draft forms.

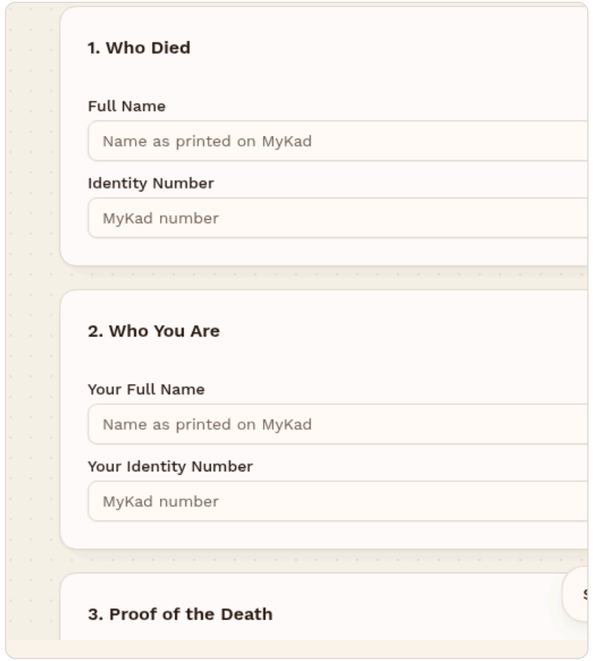

### Review

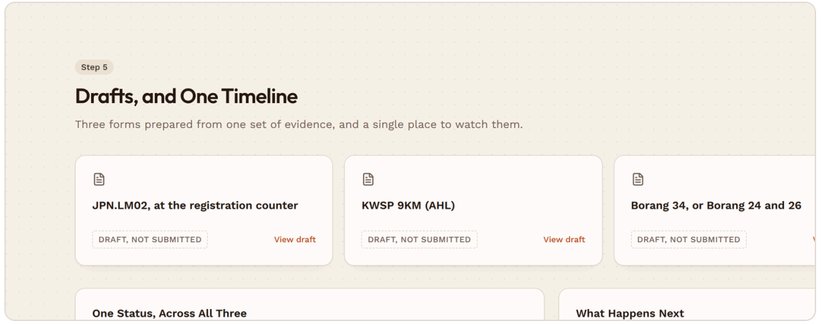

Requirements, known deadlines and questions that need checking.

### Submit Officially

The family uses official channels. Agencies decide.

**Interactive Prototype**
mytakziah.vercel.app

**INTERACTIVE PROTOTYPE. AGENCY RESPONSES SIMULATED.**

Required originals, signatures and thumbprints remain where applicable.

Sources: MyTakziah interactive prototype; reviewed JPN, KWSP and PERKESO forms in the repository research record.

DIFFERENTIATION

# 4. What Makes It Innovative?

## Share the Common Evidence. Respect Every Agency Rule.

The workflow reuses what is common, then asks only for what each route still needs.

**Shared Once** | **Deceased Identity** | **Applicant Identity** | **Proof of Death**

### JPN

Registration route, informant details and required originals.

### KWSP

Relationship evidence and payment details when the route requires them.

### PERKESO

Relationship evidence and payment details where applicable.

**AI extracts and explains. Human-maintained rules constrain. Agencies decide.**

Sources: JPN, Ordinary Registration of Death; KWSP 9KM (AHL), V20260701; PERKESO Borang 34 and benefit checklists.

CAN THIS REALLY BE DONE?

# 5. How It Works & Feasibility

## Test Preparation Before Government Integration

A bounded path tests usefulness and safety before any promise of automated submission.

### Evidence Today

Interactive prototype and documented agency-form research.

**Reality: no completed interviews, host or agency integration.**

### Supervised Preparation Pilot

[ASSUMPTION] Test one PJ community, reviewed drafts and official channels.

**Gate: user, rule and privacy review; draft-format acceptance.**

### Authorised Integration

Automated submission and status updates only after agency agreements and access.

**Gate: legal, identity, operational and technical approvals.**

Evidence status as at 12 September 2026: prototype and form research exist; interviews, host, reviewers and integration agreements are not recorded.

SHOW THE VALUE

## 6. Impact & Potential

# Test Whether Families Arrive Better Prepared

### Less Preparation Time?

### Fewer Document Corrections?

### More Relevant Deadlines Met?

**RM3.24b in 2024**

Financial stakes in EPF death withdrawals, not MyTakziah revenue.

**[ASSUMPTION] TEST ONLY AFTER USER VALUE**

Keep guidance free; test optional fixed-fee provider listings. No family-data sale, benefit commission or paid influence on guidance.

Source: EPF Integrated Annual Report 2024. Pilot outcomes and willingness to pay have not been measured.

FINISH MEMORABLY

## 7. Why Us + Closing Vision

# Help Us Test This With One Community

| | |
|---|---|
| TEAM | Four students: two Computer Science, two Actuarial Science. |
| BUILT BEFORE | Two members built Layak, a previous hackathon grand champion. |
| ASK | Community host, benefits adviser and privacy mentor. |

**MyTakziah**

One family record. Clearer next steps.

**One loss should not mean starting over at every counter.**

Team composition and Layak experience are team-supplied records. No pilot partner is secured.
